TRIGGERS

THINGS

RESPONSES

- 1 Optimize water usage
- 5 Adjust Lighting

STORY BOARD

- Temperature not appropriate and thermostatic not in.
- Take active actions to stay comfortable.
- Insulated homes help save energy and stay warm.
- The use of weather apps and news to keep up to date.
- Save energy by using stairs instead of elevators.
- Physical therapy and use of health and fitness services which helps reduce discomfort.
- Inform occupants about the importance of energy conservation and the need for potential discomfort to achieve cost effectiveness.
- Set realistic expectations.

REFLECTION CRITERIA

- Involve occupants in the decision-making process by seeking their input and feedback.
- This can be done through surveys,meetings or focus groups to understand the concerns,preferences and limitations regarding energy-saving measures.
- Provide occupants with the opportunity to opt for s pecific energy-saving measures if they have valid reasons or specific needs.
- If certain individuals have medical conditions that require specific temperature ranges,accommodate those requirements while still promoting energy efficiency in other areas.

- · Energy sensors.
- · Apps like Blink.
- · Education and awareness.
- Changes should be applied for everyone.
- Energy conservation routes.
- Monitor and adjust: Continuously monitor energy usage, comfort levels and occupant feedback.
- Make adjustments as needed to find a balance between energy savings and occupant comfort.

ELEVATORS PITCH

Ensure your home is properly insulated
Proper insulation can help keep your home warm in the winter and cool in the summer.
